ABOUT

Full-stack engineer and AI practitioner with a Pearson BTEC HND in Software Engineering and professional mobile app development experience (Flutter/Firebase, Red Jaguar Marketing). Over the past two years I have independently shipped six production-grade projects, a full-stack Spotify clone with real-time chat and AI integration, a RAG document Q&A pipeline, an AI code review agent, and a multi-agent AI system currently in development. I work across the full stack (React, Next.js, Node.js, Vue/Nuxt, Python) and build practical AI products using the Claude API, Groq, LangChain, and vector databases. I am actively pursuing junior software and AI and engineering roles.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, Dart

Frontend: React, Next.js 14, Vue 3, Nuxt 3, Tailwind CSS, Framer Motion, GSAP

Backend: Node.js, Express, REST APIs, WebSockets

AI / ML: Claude API, Groq, Ollama, LangChain, RAG, vector DBs, prompt engineering, TensorFlow (in progress)

Databases: MongoDB, Supabase (PostgreSQL), Firebase Firestore

Mobile: Flutter, Firebase (Auth, Firestore, Storage)

Tools: Git, GitHub, Vercel, Vite, Clerk, Figma, Linux CLI

Certs: Prompt Design in Vertex AI (Google), Git & GitHub Essentials

EXPERIENCE

Software Developer · Red Jaguar Marketing · Sep 2023 – Jan 2024 · UAE

- Built cross-platform iOS/Android app in Flutter/Dart from feature spec to deployment within a multi-disciplinary agile team.
- Integrated Firebase Auth, Firestore, and Storage for a full cloud-native backend; collaborated directly with designers and PMs through regular sprint reviews.
- Gained production experience in state management, component architecture, and stakeholder feedback cycles.

PROJECTS

AI Engineering Suite · Multi-Agent · RAG · TensorFlow · Claude API · *Current*

- Building a multi-agent orchestration system (research, code review, summarisation agents) coordinated via Claude API; implementing production RAG pipeline with LangChain, vector search, and grounded answer synthesis.
- TensorFlow certification in progress — applying neural networks, NLP, and time series modules to mini-projects; built 3D linear algebra visualiser in Three.js to reinforce ML mathematical foundations.

AI Code Review Agent · Next.js · Claude API · Groq · TypeScript · Streaming · 2024

- Dual-provider AI tool (Claude + Groq) returning structured JSON feedback (severity, category, fix) with streaming token output; prompt-engineered for consistent, parseable responses across models.

RAG Document Q&A · Next.js · LangChain · Vector DB · Claude API · 2024

- Full RAG pipeline: upload → chunk → embed → vector store → similarity search → LLM synthesis with source citations. Drag-and-drop UI with live progress feedback.

Spotify Clone — Full-Stack Platform · React · Node.js · MongoDB · Clerk · WebSockets · Grok AI · 2024

- End-to-end music streaming app: REST API + MongoDB backend, Clerk OAuth auth, real-time WebSocket chat, and Grok AI music assistant — fully deployed on Vercel.

Antigravity — Design Gallery · Next.js 14 · Supabase · TypeScript · 2024

- Design inspiration gallery with Supabase PostgreSQL schema (galleries, tags, bookmarks), Next.js 14 SSR/ISR, real-time search and filtering.

macOS Portfolio + Bruno Chatbot · Next.js · GSAP · Framer Motion / Nuxt 3 · Groq · 2024

- macOS-style portfolio with GSAP draggable windows, cinematic terminal entry sequence, and functional terminal widget. Bruno: deployed Groq-powered chatbot with streaming responses in Nuxt 3 / Vue 3.

EDUCATION & CONTINUOUS LEARNING

HND — Computer Software Engineering · Pearson BTEC / ITI Dubai · Mar 2021 – Mar 2023

- OOP, database design, SDLC, systems analysis, Flutter/Firebase/Figma applied project modules.

Self-Directed: NeetCode 150 DSA (JS, daily) · TensorFlow Cert (in progress) · LangChain / Hugging Face / Ollama (project-based)

Languages: English (Native/Bilingual) · Greek (Native)
